

Want to turn your compliance *costs* into an investment that delivers *profits*?

COMPLIANCE AS A PROFIT CENTER

HealthCare Compliance Network is introducing a new bundled service, **Compliance as a Profit Center (CAPC)**.

With **CAPC** we are turning our clients' compliance expenses, into investments yielding unrealized profits.

Excellent compliance is a critical cost for Healthcare Organizations wishing to avoid expensive penalties. But now, through our innovative **CAPC** process we have been able to turn the tables on that corporate cost, by using compliance initiatives to uncover new sources of profits and bottom-line growth.

Discover CAPC

- » Get full payment for services you have billed
- » Fully bill for all services you have delivered
- » Evaluate and act on new opportunities to participate in value-based care and at-risk plans

Uncover hidden profits for your organization. Contact HealthCare Compliance Network to get a **no-cost initial assessment** of your opportunity to turn your compliance costs into real bottom line growth.

Here's a Quick Look at How CAPC Works

*CAPC has three ways to bring profits
to Healthcare Organizations*

1. **Payment Integrity** – identifying underpayments for services you have delivered.

Using CAPC retrospective analytics we filter your claims payments, identifying underpayments and Payor trends. Then HCN industry veterans work with your company to implement a recurring process to continually recover lost funds.

2. **Coding Audit** – identifying your missed billing opportunities.

Capturing missed billings and correcting overall charge capture and billing practices going forward ensures that you are getting the maximum payment for documented services.

3. **Value-Based Care** – helping organizations navigate the move to incentivized risk arrangements.

Is your Healthcare Organization evaluating participation in the new government value-based care initiatives? We will assist you in determining how this strategy fits your plans for increasing profits. The HCN team will help you monitor your revenue cycle management production and trends as well as your EHR and technology to ensure the correct metrics are being measured and your organization is maximizing its opportunity for incentive dollars.
