

COVID-19 Vaccine Billing Guide

There are 11 new CPT codes for COVID-19 vaccines. Each vaccine has a specific vaccine administration code. The appropriate administration code is chosen based on the type of vaccine and which dose in the schedule (first or second dose) the patient receives.

Billing for the COVID-19 vaccine requires the use of 2 codes. The first code would be for the vaccine which identifies the manufacturer, and second code which identifies which dose is being administered.

If administering COVID-19 vaccines, received from the government and NOT the manufacturer, **DO NOT** code the CPT code for the vaccine. Code only the appropriate administration code according to the dose with ICD-10 code Z23.

Billing Example:

Pfizer COVID-19 Vaccine First Dose, vaccine received from Manufacturer:

Vaccine CPT: 91300

Administration: 0001A

ICD-10: Z23

NDC: 59267-1000-01

Billing Example:

Pfizer COVID-19 Vaccine Second Dose, vaccine received from government:

No Vaccine CPT code as received from government.

Administration: 0002A

ICD-10: Z23

NDC: 59267-1000-01

Since the Federal Government will be providing the COVID-19 vaccine when it first becomes available, there will be no reimbursement for the vaccine itself. However, there will be reimbursement for the administration of the vaccine.

For Vaccines given March 14, 2021 and Earlier
